

Five CMC students ran a race.

1. Estelle came two places behind Carlos, but did not come in last.
 2. Dan lost to Avery, but beat Barbara.
 3. Carlos did not come in first, Estelle did not come in last.
- A. What place did each student come in?
- B. Explain how you solved this puzzle, and prove that your answer is the only one that will work, using the statements above to support your argument.
