Shikaku
(Four Corners)

What are the rules of this game?

How do you win?

Unsolved

Solved
SHIKAKU

The rules:
1. Each of the following Shikaku puzzles needs to be sectioned into rectangles (and squares) along the grid lines, so that the number in each rectangle refers to the area of that rectangle.
2. Only one number can appear in each rectangle.
3. Each square on the grid is used in exactly one rectangle (that is, no rectangles may overlap).
